EDUCATION

Indian Institute of Information Technology, Bhopal

Sep. 2023 – Jun. 2027

Bachelor of Technology, Computer Science and Engineering

CGPA: 8.65/10

Relevant Coursework: **Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering**

EXPERIENCE & HACKATHONS

Smart India Hackathon 2024

Dec. 2024

Frontend Developer

National Level Hackathon

- Developed reusable React components using CSS Grid and Flexbox for a consistent UI across the dashboard, as part of a **6-member** team.
- Implemented lazy-loaded routing with React Router to reduce initial bundle size and improve page load performance.
- Built debounced client-side form validation across multiple input fields to reduce invalid submissions.
- Integrated **5+** REST APIs using Axios interceptors for JWT-based authentication, token refresh, and error handling.

PROJECTS

CampusGuide AI - RAG-Based Campus Assistant | *Java, Spring Boot, Spring AI, Ollama, Qdrant, PostgreSQL, Docker* [GitHub](#) | [Live](#)

- Built a full-stack **Retrieval-Augmented Generation (RAG)** chatbot for IIIT Bhopal using **Spring Boot 3.5** and **Spring AI**, answering natural-language queries on faculty, notices, scholarships, and placements via a fully local LLM.
- Designed a multi-collection **Qdrant** vector store with an **LLM-based query router and rewriter** to intelligently classify intent and improve retrieval accuracy across 4 domain-specific collections.
- Implemented persistent, per-session **conversation memory** using **PostgreSQL** and Spring AI's ChatMemory, injecting recent chat history into every prompt for context-aware responses.
- Deployed the application on **AWS EC2** using **Docker**, with an automated **GitHub Actions** CI/CD pipeline that builds, pushes, and redeployes the container on every push to master.

DB_MIGRATOR | *React, Node.js, MongoDB, MySQL, Playwright, GitHub Actions*

[GitHub](#) | [Live](#)

- Built a full-stack migration tool to convert **MongoDB** schemas to **MySQL** across 2 database types with live schema preview.
- Designed a **Playwright** test suite covering functional and regression workflows across all critical user flows.
- Configured **GitHub Actions** CI/CD pipeline to trigger Playwright tests automatically on every push and pull request.
- Implemented **WebSocket**-based real-time progress tracking to provide live feedback during migrations.

ComVerse - Real-Time Community Platform | *React, Node.js, WebRTC, Socket.IO, PostgreSQL*

[GitHub](#) | [Live](#)

- Developed a real-time community platform with 3D spatial UI (**React Three Fiber**) and P2P voice via **WebRTC**.
- Implemented **OAuth 2.0 + JWT** session management with role-based protected route guards.
- Built **10+** reusable custom React hooks to manage **WebSocket** state and audio stream lifecycle.
- Tested all REST API endpoints and auth flows using **Postman** before release, covering **8+** protected routes.

ACHIEVEMENTS

- Earned **LeetCode Knight** badge with a contest rating of **2061**, placing in the top **3.5%** of competitive programmers globally. [Profile](#)
- Practiced **640+** problems on LeetCode covering arrays, linked lists, trees, graphs, and dynamic programming. [Profile](#)
- Tackled **1000+** problems across competitive programming platforms including LeetCode, Codeforces, and CodeChef. [Profile](#)
- Achieved **Codeforces** rank on Codeforces and **3-Star** on CodeChef, demonstrating consistent proficiency in cp. [Profile](#)
- Secured **Top 5** teams in the **Hack-O-Sprint** Internal Hackathon at IIIT Bhopal.
- Certified **Oracle OCI AI Foundations Associate 2025**. [Certificate](#)
- Scored **97.34 percentile** in **JEE Mains 2023**, among top engineering entrance exam takers nationally.

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript (ES6+), TypeScript, Python, SQL, HTML, CSS

Backend & Frameworks: Spring Boot, Spring AI, React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, PostgreSQL, MySQL, Prisma ORM

AI/ML & RAG: Retrieval-Augmented Generation (RAG), Ollama, Qdrant, LLMs, Vector Embeddings, Prompt Engineering

Technologies: AWS (EC2), WebRTC, Socket.IO, WebSockets, REST APIs, Docker, GitHub Actions, CI/CD

Core Concepts: DSA, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Agile

Developer Tools: Git, GitHub, VS Code, Postman, Vercel, Swagger
