EDUCATION

Maharaja Agrasen Institute of Technology (MAIT)

2024 – 2028

Bachelor of Technology in Computer Science and Technology; CGPA: 9.15/10

Delhi, India

Currently in 5th Semester – Affiliated to Guru Gobind Singh Indraprastha University (GGSIPU)

EXPERIENCE

DRDO

2026

Technical Intern

Delhi, India

- Engineered scalable **full-stack applications** utilizing **Angular** and **TypeScript** for the frontend and **Java Spring Boot** for backend services, improving overall system responsiveness.
- Architected and integrated robust **RESTful APIs** with **PostgreSQL** databases, executing complex **CRUD operations** and optimizing query performance for **real-time data retrieval**.
- Collaborated within an **agile engineering environment** using **Git** version control, participating in code reviews, debugging, and the continuous integration of software modules.

PROJECTS

Military Management System | Angular, TypeScript, Spring Boot, PostgreSQL – 2026

[GitHub](#)

- Developed a comprehensive **full-stack resource management** platform, implementing secure **CRUD modules** to efficiently track and allocate military assets in real-time.
- Designed and deployed optimized **RESTful API** endpoints, leveraging **PostgreSQL** for relational data persistence and ensuring seamless client-server communication.

CodeSarthi – DSA Coding Companion Platform | React, JavaScript, Hugging Face API

2025

- Created an interactive algorithmic learning platform featuring an **AI-driven mentor** powered by the **Hugging Face API** to deliver contextual, step-by-step **algorithmic guidance**.
- Architected **modular React components** with **centralized state management**, significantly reducing API response latency and rendering real-time AI feedback.

Salary Prediction Model | Python, Pandas, Scikit-learn – 2025

[GitHub](#)

- Trained and evaluated a machine learning **linear regression model** using **Scikit-learn** to predict compensation based on experience, achieving high predictive accuracy measured by **Mean Squared Error (MSE)**.
- Streamlined the machine learning pipeline by implementing efficient data preprocessing and train-test splitting techniques using **Pandas**.

Calmio – Self-Care Website | HTML, CSS, JavaScript – 2025

[Live Demo](#)

- Built a **fully responsive, interactive** web application featuring **state-driven DOM manipulation**, carousel-based content rendering, and seamless cross-browser compatibility.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, HTML5, CSS3

Frontend: Angular, React

Backend & Database: Spring Boot, RESTful APIs, PostgreSQL, MongoDB, SQL

Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS)

Tools: Git, GitHub, VS Code, Maven

LEADERSHIP & ACHIEVEMENTS

Competed in multiple time-constrained college-level hackathons, rapidly prototyping and deploying full-stack web applications.

Volunteered actively with the National Service Scheme (NSS), organizing community outreach programs and campus-wide events.

Contributed as an active member of the MAIT College Startup Society, fostering entrepreneurial initiatives and technical workshops (2024 – Present).
